

ASEE ChE Division
Awards

for 2002

There are far more deserving individuals than the typical number of annual nominees.

Please nominate a deserving individual!

The Lectureship Award

This award is presented to a distinguished engineering educator to recognize and encourage outstanding achievement in an important field of fundamental chemical engineering theory or practice. This year the recipient will present a lecture at the ASEE Summer School in Boulder, Colorado, July 27 through August 2, 2002.

Ray W. Fahien Award

This award is presented annually to a young educator who has shown evidence of vision and contribution to chemical engineering education. Educators who have been faculty members for not more than ten years as of July 1st in the year of the award are eligible. There are two equally weighted criteria: outstanding teaching effectiveness and educational scholarship.

CACHE Award

This award, sponsored by the CACHE Corporation, is presented for significant contributions in the development of computer aids for chemical engineering education.

Lifetime Achievement in Chemical Engineering Pedagogical Scholarship

This award will be presented on an as-merited basis, not necessarily annually. It is given for lifetime achievement, recognizing a sustained career of pedagogical scholarship that not only caused innovative and substantial changes, but also inspired younger educators to new behaviors that benefitted students in chemical engineering.

A condition of receiving any of the above awards is attendance at the Chemical Engineering Division banquet at the 2002 ASEE meeting in Montreal, Quebec, Canada; June 16-19, 2002

Nomination Deadline: January 15, 2002
