

# Wiley's Got The Right Mix For You!

### Chemical Reactor Analysis & Design, 2/e

G.F. Froment, *Rijks Universiteit - Gent, Belgium*  
Kenneth Bischoff, *University of Delaware*

Maintaining the successful basics approach to industrially-related problems of their first edition, Froment and Bischoff have updated their text to cover the latest progress in modelling and computer capability.

51044-0 733pp. 1990

### Catalytic Chemistry

Bruce C. Gates, *University of Delaware*

This unique text takes disparate coverage from the fields of chemistry, biochemistry, and chemical engineering, and integrates the material into a coherent, unified whole. The text is appropriate for students at the advanced undergraduate level.

51761-5 486pp. 1990

### Fundamentals of Heat & Mass Transfer, 3/e

Frank Incropera, *Purdue University*  
David P. DeWitt, *Purdue University*

61246-4 992pp. 1990

### Introduction to Heat Transfer, 2/e

Frank Incropera, *Purdue University*  
David P. DeWitt, *Purdue University*

61247-2 896pp. 1990

Unique in its treatment of the relationship between heat and mass transfer and in its extensive use of the First Law of Thermodynamics, this revision of a best seller also shows students a systematic method for solving practical problems. *Introduction to Heat Transfer, 2/e* is an abridged version including the same coverage on the physical concepts and methodologies of heat transfer.

Winner of the 1990 Meriam/Wiley Distinguished  
Author Award . . .

### Process Dynamics & Control

David E. Seborg, *Univ. of California, Santa Barbara*  
Thomas F. Edgar, *Univ. of Texas, Austin*  
Duncan A. Mellichamp, *Univ. of California, Santa  
Barbara*

This in-depth examination of dynamic process  
models strikes an appropriate balance between  
process instrumentation and control methodology.

86389-0 714pp. 1989

Forthcoming January 1991 . . .

### Computer Applications for Engineers

Thomas K. Jewell, *Union College*

This introduction to computer software and hardware  
tools also uses Fortran programming to teach engineer-  
ing students how to use the computer as a problem  
solving tool.

60117-9 800pp. 1991

### Other Best Sellers...

Munson, *Fundamentals of Fluid Mechanics*

85526-X 843pp. 1990

Fox, *Introduction to Fluid Mechanics, 3/e*
