

ARE YOU GETTING YOUR FAIR SHARE OF THE \$12 BILLION INTERNATIONAL CHEMICAL TRADE MARKET?

AIChE's new symposium on **THE COMPETITIVENESS OF THE U.S. CHEMICAL INDUSTRY IN INTERNATIONAL MARKETS** provides sound advice and a comprehensive analysis on what you need to successfully compete in a changing and complex global market. Currently, the U.S. chemical trade industry enjoys a positive trade balance of \$12 billion. And U.S. chemical exports have been rising by 22% annually. Today, this market is facing stiff challenges in the face of global changes—the upcoming **integrated European Market (EC 92)**, **The Free Trade Act** with Canada and the **Japanese penetration** into the Asian market, which currently absorbs roughly one-third of all U.S. chemical exports.

This definitive sourcebook on international chemical trade for the 1990's provides a wealth of data on current and future trends in international chemical trade.

Pub. @-274 ISBN 0-8169-0486-3
AIChE Members \$20 Others \$40

A must reading for anyone interested in increasing international sales. Find out:

- Where to go to obtain advice and assistance to compete successfully overseas.
- How to form alliances that will help to overcome barriers and obstacles to trade.
- How to take advantage of the unique opportunities presented by the implementation of the Free Trade with Canada and EC-92.
- How to understand and successfully work through the complex Asian Market.
- and much more!
