**Come to where the career challenges are...**

Philip Morris U.S.A. Most widely known for marketing our highly successful national tobacco products. Products which have an exciting world of sophisticated engineering challenges behind them.

In fact, Philip Morris U.S.A. has long been a world leader in bringing high-level technology to the tobacco industry. By using computers and microprocessors to control the manufacturing process. By studying innovative new production processes. By continually installing the latest and most efficient high-speed cigarette-making and packing machinery at our various plants.

What opportunities does this sophisticated environment offer you, the engineer?

# Come to Engineering Country

Challenges in developing high-speed production equipment and process control systems, creating computer control laser instrumentation and involvement in high-tech R&D activities are among them.

If you're an engineer with experience in Chemical, Mechanical, Industrial or Electrical Engineering, or have technical experience in Computer Science, send your resume for more information about your challenging career in Engineering Country to:
