

C F BRAUN & CO

WORLDWIDE

ENGINEERING

For more than 70 years, C F Braun & Co has been providing engineering and construction services around the world. In addition to hundreds of projects throughout the United States, we have had assignments in more than thirty countries on six continents.

Our principal fields of activity are chemical and petrochemical plants, oil refineries, ore processing plants, coal gasification facilities, and power generating stations—both nuclear and fossil fueled. Projects have ranged in size from single units to complete grassroots complexes costing a billion dollars or more. Many have been first-of-a-kind projects utilizing new processes never-before employed on a commercial scale.

Since 1909, C F Braun & Co has stood for innovation and excellence in engineering.

Positions are available at our engineering headquarters in Alhambra, California and at our eastern engineering center in Murray Hill, New Jersey.
