

Create, construct and control your career with MILLIKEN

We provide an expanding range of opportunities to accelerate your managerial and professional career development.

Milliken's commitment to technological leadership in providing new products, processes and equipment is exemplified by the Millitron[®] machine, a computer controlled, jet-injection dyeing system created and developed by Milliken engineers and scientists for the production of multi-colored carpet, rugs and upholstery products.

The men and women we need have open minds, open enough to let us expose you to the details of the Milliken challenge. When we select each other, horizons broaden for both of us.
