

If your middle name is impatience,

maybe we can put things on a first name basis.

At Celanese, we don't think patience is much of a virtue when it comes to creativity or careers. We became a 2 billion dollar company by responding quickly and creatively to changing markets and technologies. By giving our people the opportunity—and responsibility—to respond to change, to develop, to take initiatives.

That's why you won't find any lengthy training programs at Celanese. Our management philosophy is to give our engineers and chemists significant projects and responsibilities as soon as possible. Give them as much to handle as their skills and dedication are up to in an unusually open working environment which fosters creative decision-making at all levels.

It works for you because it gives you the opportunity to grow rapidly. It works for us because it's what has made us a leader in man-made fibers, with a solid position in chemicals, polymer specialties and engineering resins. Without an impatient responsiveness, we wouldn't have pioneered triacetate, developed Fortrel® polyester or become a world leader in formaldehyde and methanol production.

If you think you'd like working in this kind of an atmosphere, let's get to know each other better. If you have a degree in engineering or chemistry, ask your placement officer to set up an interview with us. Or write John D. Grupe, Celanese Building, 1211 Avenue of the Americas, New York, N.Y. 10036.

*Fortrel is a registered trademark of Fiber Industries, Inc.
