

if YOU can answer "YES" to any of these questions, Rohm and Haas can make your life interesting.

Do you enjoy being responsible
(and the rewards that go with it)
for developing a project and
carrying it through to completion?
Do you like a job that gives free
rein to your imagination and
tests your skills?

Do you like the satisfaction of
making a contribution to society
by improving a wide range of
industrial and consumer products
or by protecting natural resources
or improving farming efficiency?

Would you like to work for a
company that is concerned with
problems of social responsibility
and encourages its employees to
be active in urban affairs?

We are not altruists. We are a
strong and growth oriented
chemical company that needs
engineers of all types—chemical,
mechanical, electrical and
industrial—who want to make a
practical contribution to
improving man's lot and at the
same time advance themselves in
the world of business. We have
doubled our sales in the past
10 years to the \$400,000,000
level. We make some 2,500
chemical products including
synthetic resins, plastics, fibers,
pharmaceuticals and animal
health aids. We are on the move
and you can move with us into
positions of responsibility just
as rapidly as you show us you
have the ability.

There's just one thing—you'll be
expected to work hard—but
you'll be in good company with
the 13,000 other people that
make up Rohm and Haas. We
have six major manufacturing
locations in the United States
and producing subsidiaries in
15 foreign countries. We need
engineers in research, production
and marketing.

Write to Manpower &
Employment #7069. It could
be good for both of us.

ROHM AND HAAS COMPANY
An equal opportunity employer.
