

if YOU can answer "YES" to any of these questions, Rohm and Haas can make your life interesting.

Do you enjoy being responsible (and the rewards that go with it) for developing a project and carrying it through to completion? Do you like a job that gives free rein to your imagination and tests your skills?

Do you like the satisfaction of making a contribution to society by improving a wide range of industrial and consumer products or by protecting natural resources or improving farming efficiency?

Would you like to work for a company that is concerned with problems of social responsibility and encourages its employees to be active in urban affairs?

We are not altruists. We are a strong and growth oriented chemical company that needs engineers of all types—chemical, mechanical, electrical and industrial—who want to make a practical contribution to improving man's lot and at the same time advance themselves in the world of business. We have doubled our sales in the past 10 years to the \$400,000,000 level. We make some 2,500 chemical products including synthetic resins, plastics, fibers, pharmaceuticals and animal health aids. We are on the move and you can move with us into positions of responsibility just as rapidly as you show us you have the ability.

There's just one thing—you'll be *expected to work hard*—but you'll be in good company with the 13,000 other people that make up Rohm and Haas. We have six major manufacturing locations in the United States and producing subsidiaries in 15 foreign countries. We need engineers in research, production and marketing.

Write to Manpower & Employment #7069. It could be good for both of us.

ROHM AND HAAS COMPANY
An equal opportunity employer.
