

from the EDITOR

The response to our first issue of **CHEMICAL ENGINEERING EDUCATION** has been most gratifying and beyond our expectations. We hope you don't mind our printing some of the first letters we have received from our readers. We expect to receive and to print some less generous ones later and want to get ahead while we can.

In accepting the congratulations of our readers, the Editor once again wishes to acknowledge the efforts of Professor Mack Tyner as Associate Editor and Professor Robert Bennett, as Business Manager. Both of these tasks are extremely arduous and time-consuming and all congratulatory messages should most properly be addressed to them and to Professor Wm. Corcoran and the Publications Board members. Without the financial help they obtained from generous donors and advertisers, this journal could not have been published.

We are very pleased to be able to publish in this issue an article by Professor Sleicher who replies directly to the article by Mr. Wing in the

first issue. Such response and reparté is encouraging and we hope it will continue.

At the same time we would like to appeal to readers to submit for publication not only articles, but especially class problems and reviews of books that have been tested in class. We feel that one of the most useful purposes our Journal can serve is to provide for an exchange of problems that has been used on examinations or as home assignments. Due credit will of course be given to the author. Similarly we believe other faculty members would be interested in their colleagues opinions of textbooks that have been used in their courses.

The Editor is also solicitous of Guest Editorials. He does not merely wish to use this journal as a sounding board for his pet ideas on education. This page and the journal, belong to all of you—the teachers of chemical engineering throughout the country; we hope you not only continue to like it, but will also continue to respond with your contributions in the form of articles, problems, reviews, and opinions.

from the READERS

Congratulations on an excellent issue of **CHEMICAL ENGINEERING EDUCATION**. I am certain that everyone interested in the education of chemical engineers will find this publication most useful. It is an important addition to the literature of the American Society for Engineering Education. . . .

M. R. Lohmann, Dean
Oklahoma State University
President of ASEE

This is an excellent presentation . . . The slick-page presentation gives a very professional appearance to the journal, and I certainly hope you will keep up the good work on both the appearance and the contents of **CHEMICAL ENGINEERING EDUCATION**.

Max S. Peters, Dean
University of Colorado
President, A.I.Ch.E.

Congratulations on a magnificent job of publishing your first issue of **CHEMICAL ENGINEERING EDUCATION**. Not only is the magazine physically attractive, but the editorial content is first-rate. I found the article by Bird particularly interesting. The content seems to be unusually well-balanced with something for everyone. In general, the journal is exactly what I have been hoping for in the last six years. . . .

L. Bryce Andersen, Dean
Newark College of Engineering
Chairman, Chemical Engineering Div.
ASEE

Just great! Your first issue of **CHEMICAL ENGINEERING EDUCATION** is outstanding, and I want to congratulate you and all your associates at the University of Florida for such a fine job. I know how much is involved to make such a thing go, and I hope you will be able to put it on a more routine basis so that it will be a pleasure as well as a great professional contribution. . . .

Wm. H. Corcoran, Executive Officer
California Institute of Technology
