
From the Editor

The Florida Geographer is the official publication of the Florida Society of Geographers and is distributed free to members of the society. It is a state-wide journal, with coverage of social and physical geographical topics. Most, but not all, articles are related to the state or at least feature Florida figures as an important component.

Manuscripts are solicited from all who feel they have research worthy of dissemination. Authors should not be dissuaded from submitting articles for review because of format considerations.

Authors should submit the final copy of the paper on a diskette or a compact disc; articles may also be submitted via email as long as the total memory required does not exceed 3 megabytes. Word Perfect or Word files are preferred; if not possible, please save files in rich text format (.rtf).

Authors should also submit all final tables and figures electronically either embedded within the document, in JPEG, or in gif format; tables may also be submitted in Excel or Quattro Pro format. Please note that all images will be printed in black and white. Please include the figure (table) number and title, which should be centered at the top of each figure (table) and the source, which should be left flush at the bottom. Figure (table) numbers and titles should not be in all caps.

Headings, paragraphs, and references should be consistent in their style. In-text citations should be used; footnotes will not be accepted. Endnotes should only be used sparingly.

Please send manuscripts, comments, or questions to:
