
COASTAL PHOTOGRAPH BY BENNETT L. BEARDEN

PHOTO 145. Breached coastal sand dune along Morgan Peninsula, Baldwin County, Alabama. View is toward the east-southeast. The upper portion of the dune is dominated by ripple cross-stratification and crestline avalanche deposits. Eolian cross-stratification, toeset, and lee deposits comprise the middle and lower parts of the dune. Rock hammer in center of photo provides scale. (9 June 1989) (Photo: Bennett L. Bearden, Geology Survey of Alabama, P.O. Box O, Tuscaloosa, AL, 35486-9780).
