COASTAL PHOTOGRAPH BY DAN COVELLO

---

*Little Pikes Inlet Fill Area, Westhampton, New York.* Aerial photograph, view northeast, of the Little Pikes Inlet Fill Project, Westhampton, New York. The western end of the Westhampton Groin Field is pictured in the upper third of the photograph. Note that sand appears to be migrating from the offshore bar system into the nearshore surf zone. Further to the west, however, beyond the fill area erosion and flooding continues to be a problem with several houses lost in the last month. (Photograph by Dan Covello, 15 January 1994.)
