JOINTLY LAUNCH A NEW WEBSITE

<http://www.CERF-JCR.com>

Don't be a serf, surf the Net with CERF! Our new multipurpose website primarily serves CERF members and JCR subscribers but additionally provides JCR editors with editorial services. The website is designed for modern large-monitor screens and advanced platforms such as Windows 95, 98, and NT. The CERF-JCR site features many services and interactive windows which we hope will encourage electronic access to many of the routine procedures that are required to run an international journal. Contributors and authors are, for example, encouraged to track the status of their manuscripts from the initial letter acknowledging receipt of the paper through the peer review process to final publication. The database, which can be accessed by author name or manuscript number, reports each stage of manuscript processing making this information instantly available to interested authors.

On the CERF-JCR website you can:

- Contact the Editor-in-Chief (EIC), Associate Editor (AE), or any other JCR editor
- Become a member of CERF
- Subscribe to the *Journal of Coastal Research* (JCR)
- Order CERF publications - CERF Books, JCR Regular Issues, JCR Special Issues
- Track the status of your own manuscript, from receipt to publication
- Download JCR's *Instructions to Authors*
- Search JCR abstracts and titles by key words
- Download International Coastal Symposium (ICS98) contents and papers, Volume 2 (only)
- Look up forthcoming journal contents
- Order copies of JCR papers via UnCover
- Discuss JCR paper contents in the CERF *Forum*, a chat room for authors and researchers
- Find coastal meetings in the JCR

Other attributes of the CERF-JCR website include sound bits, animation, coastal feature of the quarter, editorial update forms, and much more. Save time, save postage, save FAX costs, obtain information electronically - communicate with us at:

The Coastal Education and Research Foundation (*CERF*) is a nonprofit corporation dedicated to the advancement of the coastal sciences. The Foundation is devoted to the multi-disciplinary study of the complex problems of the coastal zone. The purpose of *CERF* is to help translate and interpret coastal issues for the public and to assist professional research and public information programs. The Foundation specifically supports and encourages field and laboratory studies on a local, national, and international basis. Through the medium of scientific publications, television, and radio *CERF* brings accurate information to the public and coastal specialists on all aspects of coastal issues in an effort to maintain or improve the quality of shoreline resources.

Because *CERF* is concerned with broad environmental issues, our efforts concentrate on significant problems such as maintenance of good quality (potable) water with adequate supply, and hazards associated with potential beach erosion, flooding, and susceptibility of developed shorelines to storm surge and wave attack. By focusing attention on these potential man-made and natural hazards, it is hoped that our research efforts will help others improve the quality of life in diverse coastal areas. *CERF* thus aims to stimulate awareness of coastal (marine and freshwater shorelines) land and water problems; initiate and foster research and innovation to promote long-term coastal productivity; establish an educational forum for the debate of contentious coastal issues; and develop new principles and approaches for enlightened coastal management, and encourage their adoption and use.

CERF members provide a basis for cooperative investigation of biophysical resources found in open and naturally protected coastal regions, estuaries, large inland bodies of water bounded by shorelines, wetlands, and other coastal environments. Joint investigative efforts by faculty, students, and staff at various institutions span a wide and diversified range of interrelated topics that are relevant to solutions of today's dynamic problems. It is hoped that these combined attempts to better understand the nature of coastal processes will help forestall what may become contentious issues of tomorrow.

CERF MEMBERSHIP

Members are individuals, institutions, and corporations that support the aims of the foundation through personal and group efforts or by donations. Memberships are available in different categories with privileges.
