

# JOURNAL OF NEMATOLOGY

VOLUME 1

JANUARY 1969

NUMBER 1

---

## DEDICATION

The first issue of the JOURNAL OF NEMATOLOGY is dedicated to Nathan Augustus Cobb (1859–1932) in recognition of his pioneering work in Nematology. He probably has had a more profound and permanent influence on the profession of Nematology than any other individual. The name of our new journal first appeared on the cover of his greatest works, "Contributions to a Science of Nematology," published in 1914. Unfortunately this publication was not continued as a periodical.

The Society of Nematologists and the Editorial Board hope this journal will serve to develop and to promote the Science of Nematology so ably initiated by Dr. Cobb in the early 1900's.

Nathan Augustus Cobb, 1859–1932
