Journal of Nematology (ISSN 0022-300X) is published quarterly by The Society of Nematologists. Periodical postage paid at Marceline, MO, and additional Post Offices. **Postmaster:** Send change of address notification to Society of Nematologists, PO Box 311, Marceline, MO 64658. E-mail: [son@hughes.net](mailto:son@hughes.net). Inquiries concerning subscriptions, availability of back issues, or membership in The Society should be sent to the same address. For this and other information, visit: <http://www.nematologists.org>

Mention of a pesticide, cultivar, or commercial or proprietary product does not constitute a recommendation or an endorsement of its use by editors, author(s), their institutions, or The Society of Nematologists. Authors are responsible for statements made in the Journal, whether of fact or opinion.

Printed by The Sheridan Press, 450 Fame Ave., Hanover, PA 17331. The Journal is indexed by Reenah Schaffer, Raleigh, NC.

Cover—The efficacy of four biological nematicides on root-galling, root-knot nematode (*Meloidogyne incognita*) reproduction, and shoot weight of tomato (*Solanum lycopersicum*) grown in stone wool substrate or in pots with sandy soil was compared to an oxamyl treatment and a non-treated control. For more information see the article on page 110.
